## Mission

Wateree Community Actions, Inc. empowers families and communities with low incomes to increase economic stability through partnerships and anti-poverty services.

## Description of Agency

WCAI was officially formed in July 1970 when the community actions agencies of Sumter County and Kershaw County merged. Subsequently the newly formed agency grew with the merging of three other existing community actions agencies: Lee County (Williamsburg-Lee), Clarendon County (Clarendon County Commission) and Richland County (Midlands Human Resource Commission). The merging process spanned from July 1970 until April 1988. The largest of five, Sumter County Economic Opportunity Corporation, which was formed in 1967, was the lead corporation.

Thus, the agency is now a private, nonprofit agency serving the counties of Clarendon, Kershaw, Lee, Richland and Sumter. The Community Service Block Grant (CSBG) Act provides the agency its designation as a Community Action Agency. This Act, as amended, outlines the requirements of the agency's governing structure as a tripartite board of directors. WCAI has a 15-member governing board that includes three seats for each county to include a representative of the public, private, and poor sectors in each county.

## Description of the Service Area

The agency primarily provides services throughout a five-county area including Clarendon, Kershaw, Lee, Richland, and Sumter counties. The agency's Weatherization Assistance Program provides services in the additional counties of Florence and Marion. Four counties-Clarendon, Kershaw, Lee, and Sumter-are part of what is known as the Santee-Lynches Council of Government.

The agency's Head Start needs assessment provides the following description of the Santee-Lynches area:
According to the Santee Lynches Council of Governments (SLOG)'s Comprehensive Economic Development Plan, at 2,400 square miles, Santee-Lynches is slightly larger than the state of Delaware. The region's four counties, Clarendon, Kershaw, Lee, and Sumter have long been known for agricultural productivity, with some lands under cultivation since the early 1700s. The region's prime agricultural land was a major factor in initial development and through the late $20^{\text {th }}$ century, the area remained primarily agricultural. While agriculture remains an important segment of the economy, manufacturing and retail have become dominant employment sectors. Much of the anticipated growth in the region is tied to the establishment of manufacturing facilities in each county and to the advancing urbanization from the Columbia, SC metropolitan area. The principal urbanized centers in the region are the Cities of Sumter, Camden, Bishopville, and Manning. The City of Sumter is the region's largest city, serves as a focal point for economic and social activities. Camden serves as a secondary regional center, while Bishopville and Manning serve as trade centers within their respective primarily agriculture dominated counties.
The largest industry sectors by employment in the region are currently health care and social assistance, manufacturing, and professional services. It is essential that local governments in the region continue to collaborate on essential services to build upon and reinforce the built and natural environments, as well as the human potential of the region's residents.
The table below illustrates that the Santee Lynches region is one of the most agriculturally prosperous regions in the state with the individual counties ranking $3^{\text {rd }}, 4^{\text {th }}, 7^{\text {th }}$, and $12^{\text {th }}$ in the State of South Carolina for value of agricultural products sold. With over $\$ 500$ million in market value of products sold and over 1,800 farms totaling 575,000 areas of farmland, the agricultural second is a steady and growing part of the regional economy.

However, according to the CED, the region's economy is currently in a state of evolution. What was once a primarily agrarian economy is now expanding to include manufacturing, logistics and distribution. Traditional textile mills have yield to advanced technologies that develop plastics, ceramics and advanced textiles which leads to evolving manufacturing facilities that demand a high-wage, highly skilled workforce.

As the economy in the region grows, so does the demand for individuals with strong skills sets me communications, engineering, and advanced manufacturing processes. The manufacturing industry has changed and is not the industry of generations past. Many systems are highly mechanized, necessitating a workforce with advanced degrees in engineering coding technologies and computer sciences. Other systems may not require individuals with advanced degrees, but do need uniquely skilled workers with specific training, certificates, and apprenticeship.

The Santee Lynches region is home to six school districts with a 2016 enrollment of nearly 35,000 students. Sixty-three schools are spread across these districts, staffed by more than 5,300 faculty and staff helping students develop the world-class skills to become career and college ready.

There are three major higher education institutions in the region. Central Carolina Technical College (CCTC) a public, two-year institution that is part of the SC Technical Education System offers over 50 programs of study. CCTC is dedicated to fostering a positive teach and learning environment for students in Clarendon, Kershaw, Lee, and Sumter Counties. It offers associated degrees, diplomas and certificates and uses both traditional and online courses and has cooperative agreement for an easy transfer to other four-year institutions. The University of South Carolina-Sumter awards Associate in Arts and Associates in Science degrees and provides for the completion of selected bachelor's degrees through cooperative agreements and delivery structures with other USC System institutions. USC Sumter also provides general education and upper division coursework applicable to baccalaureate degree programs through the Palmetto College. Morris College is a historically black (HBCU) co-educational, liberal arts college, operated by the Baptist Educational and Missionary Convention of South Carolina. The College offers the following degrees: Bachelor of Arts, Bachelor of Fine Arts, and Bachelor of Science with majors in Biology, Business Administration, Health Science, Mathematics, Organizational Management, Recreation Administration, and teacher preparation for certification in Biology and Mathematics in addition to Bachelor of Science in Education with majors in Early Childhood Education and Elementary Education.

The region also has a strong military presence, is one of the largest in South Carolina, and has an annual economic impact in excess of $\$ 2.5$ Billion while also supporting over 17,000 jobs. This military presence includes Shaw Air Force Base, the US Army's Central Command, contractors, military retirees, portions of the South Carolina National Guard and the US Army Reserve. While not physically located in the Santee Lynches region, the U.S. Army's Fort Jackson also has a significant impact, particularly in Kershaw County, which is located immediately to the northeast of the installation. Shaw Air Force Base was built in 1941 in Sumter and is one of the oldest regional Unified Combatant Commands in the U.S. Air Force. Approximately 7,000 active duty and reserve personnel are assigned to the base, with the majority of personnel living off base. More than 1,000 civilians also work on base. Shaw's host unit is the $20^{\text {th }}$ Fighter Wing, the largest F-16 combat wing in the Air Force. Shaw Air Force Base is also home to the Headquarters of Ninth Air Force, U.S. Air Forces Central (AFCENT). Additionally, the headquarters for US Army Central (ARCENT) transferred to Shaw Air Force Base in 20II. Shaw AFB also hosts elements of the 372 ${ }^{\text {nd }}$ Training Squadron, $337^{\text {th }}$ Recruiting Squadron; Air Force Audit Agency; Air Force Office of Special Investigations and Air Combat Command's F-16 Aerial Demonstration Team.

It is significant to note that natural disasters have taken center-stage in affecting the local economy of Santee Lynches from 2014-2016. In 2015, both Clarendon and Sumter Counties experienced a severe winter storm that was declared a major federal disaster. In October 2015 all four counties in the region endured severe flooding, which was declared a major disaster and again, in October 2016, the region again faced a major disaster as Hurricane Matthew created additional damage to infrastructure and property.

The Kids Count index uses four domains to capture what children need most to thrive: 1) Economic Well Being, 2) Education. 3) Health and 4) Family and Community. Each domain includes four indicators for a total of 16 . These indicators represent the best available data to measure the status of child well -being. The first step in the process of determining where a county ranks is to look at the demographics for a particular area or region.
The most populous county in the service area is Richland County. Wikipedia provides that, "As of the 2020 census estimate, the population was 416,147 , making it the second-most populous county in South Carolina, behind only Greenville County. The county seat and largest city is Columbia, the state capital. The county was founded in 1785. Richland County is part of the Columbia, SC Metropolitan Statistical Area. In 2010, the center of population of South Carolina was located in Richland County, in the city of Columbia. According to the U.S. Census Bureau, the county has a total area of 772 square miles ( $2,000 \mathrm{~km} 2$ ), of which 757 square miles ( $1,960 \mathrm{~km} 2$ ) is land and 15 square miles ( 39 km 2 ) $(1.9 \%)$ is water. Richland County is situated in the center of South Carolina.

The SC Department of Employment and Workforce's (DEW) listing of the top 20 employers in Richland County consist of primarily Federal and State government agencies, health care organizations, insurance organizations and educational entities. Not surprisingly therefore, the largest industries in Richland County are health care and social services, public administration, retail trade, and educational services.

As the state capital, it is the seat of state government Richland County is the home of the US Army Training Center and Fort Jackson Army Base. Fort Jackson is the U.S. Army's main production center for Basic Combat Training. The installation trains 50 percent of the Army's Basic Combat Training load and more than 60 percent of all women entering the Army each year. Training in excess of 48,000 basic training and 12,000 additional advanced training Soldiers every year. A 2017 article in the Columbia Business Report indicated that a Darla Moore School of Business study found that Fort Jackson military base had an "economic impact of $\$ 2.2$ billion. It had a workforce of 7,500 in military and civilian jobs, and that the combination of payroll, goods and services provided by local suppliers, translate to a total of 19,848 jobs in the Midlands and approximately $\$ 1$ billion in income."

Richland County is also home to the University of South Carolina's main campus. The university's website indicates:

The University of South Carolina (also referred to as USC, UofSC, or simply Carolina) is a public research university in Columbia, South Carolina. It has seven satellite campuses throughout the state and its main campus covers over 359 acres (145 ha) in downtown Columbia not far from the South Carolina State House. The Carnegie Foundation categorizes the university for the Advancement of Teaching as having "highest research activity." U.S. News \& World Report has ranked it as an "up-and-coming" university, and its undergraduate and graduate International Business programs have ranked among the top three programs in the nation for over a decade. It also houses the largest collection of Robert Burns and Scottish literature materials outside Scotland, and the world's largest Ernest Hemingway collection. Founded in 1801 as South Carolina College, USC is the flagship institution of the University of South Carolina System and offers more than 350 programs of study, leading to bachelors, masters, and doctoral degrees from fourteen degree-granting colleges and schools. The University of South Carolina has a total enrollment of approximately 50,000 students, with over 34,000 on the main Columbia campus as of fall 2017 - making it the largest university in the Carolinas. USC also has several thousand future students in feeder programs at surrounding technical colleges. Professional schools on the Columbia campus include business, engineering, law, medicine, pharmacy, and social work.

## Overview of Assessment Process

According to the CSBG Act, the agency is required to conduct an agency-wide needs assessment every three years. Additionally, the South Carolina Department of Administration, Office of Economic Opportunity, the State pass-through and administrator of CSBG, LIHEAP, and Weatherization funds, requires all community action agencies in South Carolina to update the needs assessment on an annual basis.
The conduction of the community-wide needs assessment for the 2020 program year represents a new 3-year cycle and component of the planning process. Thus, this needs assessment will determine needs and priorities for the
agency to address throughout the next 3 years from 2020 until the conclusion of program year 2022. The needs assessment will be updated annually throughout this period to reflect and develop mechanisms to address environmental and economic changes that impact the agency's ability to achieve mission driven outcomes. The conduction of this needs assessment involved the following:

1. A full analysis of the service area to include its demographic composition, income levels, prevalence of poverty, educational outcomes, employment related concerns, housing related concerns, healthcare related concerns, prevalence of crime, and levels of civic engagement and involvement.
2. Analysis of the prior year's program operations, results, and demographic data.
3. Collection and analysis of customer, board, staff and other stakeholder surveys to include both quantitative and qualitative data.
4. Collection and analysis of agency customers' satisfaction data.

## Method of Qualitative Data Collection

Qualitative data from partners and other community stakeholders is gathered through Advisory Committee meetings and other community partner meetings that are held regularly in Sumter, Lee, Kershaw and Richland counties. In one such meeting held in Richland County committee members discussed at length their thoughts on the causes and conditions of poverty as developed through interaction with their various customer base. Qualitative data is also gathered formally through the deployment of surveys that can be completed either online with the assistance of Survey Monkey or in person to a paper form. Board members and customers staff participated in completing surveys. Data is also gathered through various interactions with partners, community stakeholders, and customers.

## Method of Quantitative Data Collection

Quantitative data was gathered utilizing a customer needs assessment survey instrument. It was also gathered through the operation of the prior year's services in the count of customers and outcome achieved. Qualitative data was also gathered from various sources and online tools that assisted in gathered Census data from the American Community Survey. Quantitative data is also gathered in the collection of the customer satisfaction surveys.

As Survey Monkey was utilized, all questions asked are presented in the body of data accompanying this summary.

## Method of Data Analysis

The method of data analysis utilized to come to the determination of priorities presented in this needs assessment is the Five Whys.
$1^{\text {st }}$ Why Question: Why do individuals and households need our services?
Answer: Customers primarily come to us when they find themselves in crises situations facing utility disconnection or eviction because they do not have the funds to pay.

## $2^{\text {nd }}$ Why Question: Why can they not pay these bills?

Answer:

1. Because they have limited or no financial resources.
2. Already limited financial means are being further eroded due to inflation that is affecting the pricing of food, housing, and everything. The costs of goods and services is drastically outpacing their limited income.
$3^{r d}$ Why Question: Why do they have limited financial resources?
Answer:
a. Because $58.12 \%$ of all income sources are of a fixed nature such as supplemental security income, disability, social security and some retirement and pension payments.
b. $74.9 \%$ of families served have income below $100 \%$ of the Federal Poverty Level (FPL) while another $14.10 \%$ of families have incomes at or between 101-125\% of the FPL.
c. Only $20.71 \%$ of customers over the age of 18 have full-time employment while another $10.04 \%$ have part-time employment. This employment does not provide a living wage. Another $45.33 \%$ of customers are unemployed where 20.93\% of customers are not included in the labor force (meaning that they are not seeking employment of any kind).

## $4^{\text {th }}$ Why Question: Why are their benefit levels and earnings so low as to not provide a living wage?

Answer: Because customers have lacked the skills or knowledge to be paid higher wages (resulting in higher benefits at retirement).

## $5^{\text {th }}$ Why Question: Why do customers lack the skills or knowledge to be paid higher wages?

Answer: Because some do not have even a high school (29.17\%), diploma and some have only a high school diploma or GED (40.33\%). 30.50\% of customers age 25 and over have some amount of postsecondary.

## Summary and Analysis of the Causes and Conditions of Poverty

There are many lessons to learn and opportunities for service delivery evidenced throughout the various data sources used to compile this community needs assessment. For example, there exists a great correlation between the customer surveys and the online tool compilation of census data between issues such as the lack of insurance and cost burden of healthcare-related concerns and the disproportionate number of African Americans within South Carolina and the agency's service area that are affected by issues stemming from a low socio-economic status such as decreased literacy rates. It is notable that within Wateree's service area there is a $16.89 \%$ (down from17.59\%) poverty rate exceeds both the national poverty rate of $11.9 \%$ (down from 13.40\%) and the state poverty rate of $13.8 \%$ (down from $15.4 \%$ ). Even with these reductions in poverty rates, the agency has seen unwavering demand for our services, especially since the onset of the COVID-19 pandemic in March 2020, such that we have made continuous modifications to our service delivery model in attempts to satisfy demand at least partially. This summary will seek to identify why this is by analyzing census information, customer and board needs assessment response, the previous year's demographics of the customer served within WCAl's Community Services Department, as well as qualitative information given through interaction with customers and community partners such as other service providers.

## Key Observances from the Data

## Population Change

There continues to be a trend of population shift from the most rural counties of Lee and Clarendon. Census data reports a-13.99, a $-10.94 \%$, and a modest $-1.77 \%$ change of population in Lee, Clarendon, and Sumter counties, respectively. However, due to increases of $6.01 \%$ and $8.27 \%$ in Kershaw and Richland, respectively, the service area as a whole has a documented $4.46 \%$ in population growth. This is critical information to consider as the decennial census is used to recalculate the funding formulas for distribution from federal and state governing bodies.

## Poverty

While the highest percentages of persons in poverty within the service area exist within the more rural counties of Lee and Clarendon of $23 \%$, $(3,470)$, down from $25.8 \%(4,075)$ and $23.2 \%(7,526)$ [now $18.4 \%$ and 5,901 ] respectively, the largest quantity of persons $(64,234)$ [now 62,651 and $16 \%$ ] living in poverty is in the more urban county of Richland with the second highest quantity $(19,818)$ [now 21,301 ] living in Sumter. Overall, the service area has a decreased poverty rate of $16.89 \%$ from $17.59 \%$ that remains higher than the national average of $11.9 \%$ down from $13.4 \%$ and the state poverty rate of $13.80 \%$ down from $15.4 \%$.

| Report Area | All Ages <br> No of <br> Persons | All <br> Ages <br> Poverty <br> Rate |
| :--- | ---: | :--- |
| Report Location | 102,943 | $16.89 \%$ |$|$| Clarendon County, <br> SC | 5,901 | $18.40 \%$ |
| :--- | ---: | :--- |
| Kershaw County, SC | 3,620 | $14.40 \%$ |
| Lee County, SC | 21,370 | $23 \%$ |
| Richland County, SC | 703,004 | $13.80 \%$ |
| Sumter County, SC | $20.50 \%$ |  |
| South Carolina | $38,371,394$ | $11.90 \%$ |
| United States |  |  |

The data evidence a distinctly disproportionate number of African Americans living in poverty throughout the service area. For example, in Kershaw County where $71 \%$ of the total population White and only $25 \%$ is African American, $52 \%$ of the persons living in poverty are White while $41 \%$ are African American. Therefore, while only $25 \%$ of the population is African American, African Americans comprise $41 \%$ of persons living in poverty. In another example of Richland where $47 \%$ of the population is White and $45 \%$ is African American, the number of African Americans living in poverty is more than double that of Whites living in poverty. $62 \%$ of persons living in poverty are African American while 28\% are White.

## Population by Race by County

| Race | Clarendon | \% | Kershaw | $\%$ | Lee | $\%$ | Richland | $\%$ | Sumter | \% |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| White | 16,430 | $47.40 \%$ | 44,174 | $71.30 \%$ | 6,248 | $33.10 \%$ | 184,034 | $47.20 \%$ | 52,520 | $48.80 \%$ |
| Black | 17,114 | $49.40 \%$ | 15,514 | $25.10 \%$ | 11,892 | $63.00 \%$ | 178,828 | $45.90 \%$ | 49,945 | $46.40 \%$ |
| American Indian/Alaskan Native | 68 | $0.20 \%$ | 241 | $0.40 \%$ | 58 | $0.30 \%$ | 609 | $0.20 \%$ | 273 | $0.30 \%$ |
| Asian | 50 | $0.10 \%$ | 340 | $0.60 \%$ | 24 | $0.10 \%$ | 9563 | $2.50 \%$ | 1343 | $1.30 \%$ |
| Native Hawaiian/ Other Pacific <br> Islander | 0 | $0.00 \%$ | 0 | $0.00 \%$ | 0 | $0.00 \%$ | 290 | $0.10 \%$ | 0 | $0.00 \%$ |
| or more races | 884 | $2.60 \%$ | 1522 | $2.50 \%$ | 870 | $4.60 \%$ | 17710 | $4.50 \%$ | 4680 | $4.40 \%$ |
| Other | 548 | $1.60 \%$ | 888 | $1.40 \%$ | 233 | $1.20 \%$ | 7529 | $1.90 \%$ | 1224 | $1.10 \%$ |

## Key Observances of 2021 Community Services Program Demographics

- More than twice as many females ( $67.16 \%$ ) than males ( $32.83 \%$ ) were served (no remarkable change from prior year)

- $91.74 \%$ of the individuals that were served were African American

- 7747 up from the previous report 6103 of individuals were between the ages of 18 and 59 . However, this is only $41.14 \%$ of the persons receiving services. This represents a decrease of $31.86 \%$ of people served that are of prime working age
- $43.39 \%(8170)$ of individuals served are 17 years of age or younger meaning that almost half of the persons that we serve are not of age to earn a living wage
- $13.74 \%$ of individuals served are children 5 years of age or younger

- $32 \%$ of the income sources reported included income from employment
- $\mathbf{6 0 . 8 5 \%}$ of income from sources besides employment included social security retirement or disability, supplemental security income, pension, workmen's compensation, and disability sources. Yet only 10.22\% of customers served are of retirement age (65+)
- $30.95 \%$ of income sources reported were from public and other assistance. Other assistance includes income from family and friends.

- $29 \%$ of persons served age of 25 did not have a high school diploma or GED
- $38 \%$ of persons served age of 25 had only a high school diploma or GED
- $33 \%$ of persons served age of 25 had education beyond high school

- This means $67 \%$ of adults served have no educational attainment beyond high school.
- $40 \%$ of families served are headed by single females while $48 \%$ families are a single person

- $31.81 \%$ of families have incomes at or below $50 \%$ of the Federal Poverty Guidelines
- $22.41 \%$ of families have incomes at $51-75 \%$ of the Federal Poverty Guidelines
- $20.68 \%$ of families have incomes at $76-100 \%$ of the Federal Poverty Guidelines
- This means that $74.90 \%$ of families served had incomes at or below $100 \%$ of the Federal Poverty Guidelines.

- Only $2.05 \%$ of customers could verify any affiliation with military service

- $89 \%$ of customers served report having some kind of health insurance. Some of this will only be the 'family planning' option that South Carolina Medicaid plans allow but this percentage is unknown. $90 \%$ of individuals served have health insurance; $69 \%$ is under Medicaid and another $16 \%$ is under Medicare

- $11 \%$ of individuals served reported having a disabling condition. In order to be counted as disabled an individual must receive a federal disability benefit; consequently, this number excludes a number of individuals that would be recognized as disabled by the Americans with Disabilities Act. An enumerable amount of customers that report no income tell us that they are in the process of fighting for disability benefits. We have no way of tracking the exact number due to how the database is designed to adhere to grant guidelines.
- $20 \%$ of individuals served over the age of 18 worked full-time employment while another $12 \%$ worked parttime; $47 \%$ were either long-term unemployed, not in the labor force, or were retired

## Analysis of Data by Dimension:

- Education-seven out of nine board responses received expressed education as a priority need ranked between 1,2 and 3 . Census data indicates that on average $11 \%$ of individuals within the service area have no high school diploma and $26.8 \%$ of individuals have only a high school diploma. The demographic data of customers served by the agency evidences that $67 \%$ of them have no education beyond high school and $29 \%$ of adult customers did not graduate from high school. The Statistical Atlas that cites data from the US Census Bureau further indicates in 2018 that Sumter and Richland had the highest numbers (12,000 and 23,300 respectively) and percentages ( $9.4 \%$ and $14.1 \%$ respectively) of persons over 25 without a high school diploma; however, Lee and Clarendon counties maintain the highest local population without diplomas at $22.4 \%$ and $20.5 \%$, respectively. What is clear is that while Census data indicates steady high school graduation rates, individuals and families that seek services from the agency are most clearly identified in the population that did not graduate with a high school diploma or that did not seek additional education after receiving their diploma. From the customer needs assessment $31.82 \%$ of respondents indicated that they did not have a high school diploma. While respondent interests in educational services is drastically reduced from the previous survey period, this can most likely be attributed to the ongoing pandemic and inflation providing an added burden to their already crisis situation. Even in this situation, there is still interests in receiving case management towards educational goals, obtaining financial aid and specialized skills training.

SC Department of Education data presented by the State Epidemiological Outcomes Workgroup for the 2019-2020 year indicate that, for comparison, Darlington had the highest high school graduation rate of $92.56 \%$, while Union had the lowest at $76.10 \%$. The high school graduation rates of counties within the agency's service area are as follows:

| County | Rate |
| :--- | :--- |
| Clarendon | 84.16 |
| Kershaw | 86.38 |
| Lee | 89.60 |
| Richland | 83.04 |
| Sumter | 80.83 |

- Employment- six of nine board responses received expressed employment and/or finances as a priority need. More specifically $55 \%$ of board responses indicated employment as priority need \#2. $41.33 \% \%$ of surveyed customers indicate that a lack of good paying jobs with benefits is a problem while $29.60 \%$ of respondents indicate that people often lack the skills to obtain a job. Qualitative data gleaned from the surveys indicate that a major obstacle to employment is some state of impairment or disability in the household. Overall, the unemployment rate within the service area continues to decrease, aside from the rise during the pandemic. The service area had an average unemployment rate of $3.4 \%$ in May of 2021. However, this issue is complex in that many of the agency's customers have been without employment-unable to find it and that they have ceased to look for employment -or they have some form of temporary disability, thereby falling out of the calculation that determines the unemployment rate. In fact, 20.94\% of the agency's 2021 customers report long-term unemployment/not in the labor force. Thus, the publicized unemployment rating is not a good marker by which to gauge needs around the employment dimension. Additionally, $60.85 \%$ of income sources other than employment are fixed, such as SSI/SSA. More customers present with some sort of family support as their only income telling us that they are applying for disability benefits. Further, as more and more jobs require education above a high school diploma and specialized technical skills, many of the agency's customers are not qualified for this type of employment as $58 \%$ of customers have only a high school diploma or less.
- Income Management-three of nine board responses ranked income management as priority one, while another 2 board responses rank it as priority 3 . Additionally, feedback from community partners also
provides that budgeting and money management are greatly needed. $67.95 \%$ of responses to the needs assessment survey indicate that they lack knowledge of budgeting, while $54.99 \%$ of responses indicate difficulty with money management.
- Housing-8 of 9 board responses ranked housing needs from priority 1 to 4 with only 2 ranking it first and 1 ranking it $2^{\text {nd }}$. Housing assistance is our most requested service, even outranking utility assistance. Qualitative data from community stakeholders also indicate that not just housing, but rather affordable housing is a priority need. Community partners and stakeholders have long indicated that Wateree should have a program(s) that addresses housing beyond what the agency does in our General Emergency Assistance Program of eviction prevention. There is a national affordable housing crisis that is highly documented in the media, and it has only been further exacerbated by the end of pandemic moratoriums and now, raising inflation. Rents have risen drastically, and we have witnessed where some customers are paying more than their earnings for rent.

However, qualitative data from customers provided with rent assistance during the pandemic evidenced that eviction moratoriums were interpreted as that they did not have to pay their rent regardless of their economic situation. We heard this from customers on fixed incomes, customers that received pandemic unemployment, and customers with employment income. A December 21, 2020 WLTX news story "estimated that there will be 120,000 evictions filed in South Carolina [by January 2021]." This story goes on to cite that there were 80 eviction cases pending with 29 of those ending in eviction during the moratorium. Eviction lab data has not been updated for SC since 2016 when Richland County was listed as having the $8^{\text {th }}$ highest rate of evictions in the entire country.

- Health \& Social/Behavioral Development-this is an extremely broad category to assess that includes mental and physical health as well as nutrition and engagement with the criminal justice system and consideration for special populations such as seniors and disabled persons. one board response ranked this area as number 1,3 ranked it as number 3,2 as priority 4 , and 3 as priority 5 . The most significant data source found with which to evaluate this broad category was produced by the SC State Epidemiological Outcomes Workgroup (SEOW) to provide the Department of Alcohol and Other Drug Abuse services (DAODAS) guidance in order to plan for prevention services.

They evaluated, by county, the abuse and misuse of various drugs, and the key substance use-related issues of crime rates, high school graduation rates, and food insecurity. What was found that while had very minor declines in the rate of certain drug-related hospitalizations, all other counties in the service area experienced significant increases from 2018 to 2019.

As for crime, specifically, data from the SC Law Enforcement Division was utilized to rank SC counties. Violent crimes, such as murder, sexual battery, robbery, aggravated assault and property crimes, such as breaking and entering, motor vehicle theft, larceny, and arson are included. This data indicates, for comparison, that Abbeville has the lowest rate of 104.78 and Orangeburg has the highest rate at 562.92. Counties within the agency's service area have rankings as follows:

| County | Rate |
| :--- | :--- |
| Clarendon | 383.17 |
| Kershaw | 304.28 |
| Lee | 386.26 |
| Richland | 521.07 |
| Sumter | 394.96 |

Despite higher incidences of crimes being committed, WLTX reported in a November 2021 story that SC has on of the lowest rates of re-offense once an inmate is released. This rate being $21.9 \%$ at the time. However, it seems that the rate increases with youth in that the recidivism rate among 19-25 year old age group is $90 \%$.

Some other health related statistics are as follows:

| County | \% with Physical <br> Distress | \% with Mental <br> Distress | \% with <br> Diabetes | \# HIV Cases | \# Food <br> Insecure |
| :--- | :--- | :--- | :--- | ---: | ---: |
| Clarendon | 14 | 15 | 16 | 150 | 6,190 |
| Kershaw | 11 | 13 | 13 | 169 | 7,700 |
| Lee | 16 | 16 | 18 | 111 | 3,750 |
| Richland | 12 | 13 | 11 | 2,829 | 65,430 |
| Sumter | 13 | 14 | 14 | 654 | 19,010 |

Customer surveys and census data indicate a great need for health-related services due to a lack of insurance and the high costs of healthcare, especially for single person households. $56 \%$ of customer survey respondents note that health care is a need due to the lack of health insurance. $55.87 \%$ site a lack of being able to pay for prescriptions and $47.44 \%$ indicate that there is a lack of income to pay the copay at a doctor's appointment. In fact, $89 \%$ of customers reported insurance coverage in 2021. However, there are known limitations to this Medicaid coverage for adults 18 years of age in South Carolina. Maternity coverage for expectants mothers and coverage for children under the age of 19 is the most comprehensive coverage offered under Medicaid in South Carolina. Adults, for example, can only receive emergency dental services and while they are eligible for an eye exam, they can only get glasses after cataract surgery. As far as coverage specifically related to medical examinations, many customers only receive what is known as 'family planning' coverage which may cover the expense of birth control.

To add to issues of persons being underinsured as far as health insurance is concerned, the service area has a higher-than-normal prevalence of certain diseases and risk factors that negatively impact life expectancy. Likewise, the incidence of other sexually transmitted diseases are also disproportionately higher in the agency's service area versus the state and nation. Other health markers such as low infant birth weight, infant mortality and mortality from certain cancers and cardiovascular diseases also present to be higher in the service area versus in the state as a whole and in the nation.

Nutrition-census data indicates there were 23,213 households with income levels below the poverty level that were not receiving SNAP payments in 2019. 33,995 households under the poverty level do receive SNAP benefits. Thus, it is clear that fewer eligible person receive the benefit than are actually qualified to get it. Anecdotal data from households served by the agency indicates that most household deplete their SNAP benefit prior to the time for new benefits to be issued. Anecdotal data also indicates that many customers are 'selling' their food stamps to meet other basic household needs. In 2019, census data shows that the agency's service area had in excess of $73 \%$ of children receiving free and reduced lunch when the state average is approximately $63.21 \%$ (national is $49.63 \%$ ) evidencing a lack of income to fully support the nutritional needs of families.

- Civic Engagement and Community Involvement—board responses to ranking this category as a need provided that 4 of 9 indicated this as priority 1 while 4 of 9 indicated it as priority 6 . One other board response ranked this area as priority 4 . One of the most profound ways in which to gauge civic engagement and community involvement is through volunteerism. The Corporation for National Community Service that administers the AmeriCorps and Senior Corps programs provides top rankings for volunteerism by state and city. Out of 50 states, South Carolina is still ranked $32^{\text {nd }}$ in terms of volunteerism at $30.8 \%$. As far as city rankings, only the Charlotte-Concord-Gastonia, NC-SC metropolitan statistical area made the top 50 ranking at $20^{\text {th }}$ among cities. Another way to determine level of engagement is by assessing voting information. From the previous needs assessment, since the data has not been made available for 2020, South Carolina's 2018 general election, Kershaw had the highest percentage of registered voters turn out to vote at $57 \%$. Non-county specific voter results evidence extremely low turn-out for the primary elections in 2020.

Data from AmeriCorps.gov on informal civic engagement behaviors shows a wide variety of engagement for different activities. It cites, for example that only $21 \%$ of persons will get together to do something positive for the community, while $70 \%$ of persons will have a conversation with their neighbor. Qualitative data from
our customers indicates that there is a general disengagement from every day, 'normal' happenings such as knowing current events from watching, reading or even listening to the news.

## Conditions of Poverty

Conditions of poverty as revealed by both the quantitative data contained within this report as well as qualitative data from customers and collaborating community stakeholders include the following:

* An inability to consistently ensure for the basic needs of food, clothing, shelter, and utilities
* Increased need for safety net programs such as utility assistance, nutritional assistance, and housing subsidies
* A lack of reliable transportation and affordable childcare
* An inability to obtain adequate consistent health, dental, and vision care thereby negatively impacting the quality of life
* Unstable housing due to a lack of affordability resulting in frequent moves and poor rental histories.
* These already existing problems are being greatly exacerbated by inflation and the current recession that is causing the costs of all goods and services to increase

## Underlying Causes of Poverty

1. 2. The underlying cause of poverty is evidenced by the data to be a lack of educational attainment. While Census data indicates that $11 \%$ of individuals have a no high school diploma and $26 \%$ having only a high school diploma, a disproportionate number of these individuals are seeking agency assistance. $29 \%$ of the agency's customers in 2021 that were 25 or over did not have high school diploma, while $38 \%$ had only a high school diploma. Thus, $67 \%$ of the agency's customers have only a high school diploma or less. The lack of educational attainment is more prevalent with how rural the service area is. This lack of educational attainment for persons of working age directly affects their ability to obtain employment and thus earn a living wage whereby they would most likely gain access to healthcare, increase nutritional resources, transportation, and more stable, unsubsidized housing.
1. $60.85 \%$ of the income sources reported other than employment are representative of fixed incomes, such as social security, disability, supplemental security income and pensions and retirement while only $10.22 \%$ of customer served are of retirement age. This indicates that a large part of the customer-based are on fixed incomes, some due to their own disabling conditions, some due the disabling condition of a close family member, that limits their ability to earn income.

## Recommendation-Priorities

In keeping with the agency's mission to partner with other agencies and to conduct a range of services geared toward reducing poverty problems, priorities have been established based on the results of this needs assessment as follows:

Priority \#1—Education (Youth Leadership and Self-Sufficiency programs)
Priority \#2—Employment (Employment program)
Priority \#3—Housing (General Emergency Assistance Program—eviction prevention program)
Priority \#4-Income Management (budgeting, understanding credit and credit repair, home buying process, banking and banking products, and VITA Tax program)

Priority \#5-Health \& Social/Behavioral Development—(Nutrition-Meals on Wheels \& Voucher program, also includes Mayfairs-hygiene kits, health fairs, medical/dental/vision support, linkages)

## Priority \#6—Civic Engagement

Priority 1:

Need: (1) Individuals lack high school diplomas; (2) Individuals lack vocational training opportunities

Family Level—Education to include case management of customers towards goals, tuition assistance and partnerships with other organizations for tuition assistance and goal obtainment

Need: Youth lack opportunities for social/emotional/community engagement and knowledge of educational/career opportunities

Family Level—Youth Leadership Program to include character education, summer internship opportunities, and both educational and social enrichment opportunities

Priority 2:

Need: Individuals with limited job experience lack on-the-job training/internship opportunities

Family Level-Employment to include case management for job search requirements, resume building, on-the-job placements, as necessary, and partnerships

Priority 3:

Need: Individuals lack housing sustainability due to impending evictions

Family Level-GEAP to offer eviction prevention services to customers in need of housing stabilization services

Need: Agency lacks knowledge of affordable housing plans and resources

Agency Level-Housing exploratory program to research and better understand current plans that may exists and the different methods, partnerships, and funding available to further address the problem of creating more affordable housing within our service area.

Need: Community lacks affordable housing

Community Level-While this need is undeniable, before attempting to address this need, the agency will investigate the agency level need stated upon to better understand current housing plans within the service area. Due to the prohibition of utilizing CSBG funds for acquisition and permanent improvement of property, we need to understand more about the available resources to expand housing opportunities.

Priority 4:

Needs: (1) Individuals lack budgeting skills; (2) Individuals lack knowledge of how credit works; (3) Individuals need homebuyer training; (4) Individuals need free tax preparation services

Family Level—Income Management to include case management providing education on how to budget considering both income and expenses, how credit works and accessing a free credit report, providing homebuyer training and VITA Tax services

Priority 5:

Needs: (1) homebound individuals lack socialization and the ability to obtain nutritious meals on their own; (2) seniors who have a health condition that can be improved with diet and exercise lack the resources to obtain healthy food and the skills and knowledge about how to prepare it.

Family Level—Nutrition to includes individual enrollment of persons from the Meals on Wheels waiting list or in Richland County

Priority 6:

Need: low-income persons need to be more engage in the community
Agency Level—Board members will engage with members of the community about local issues as appropriate
Family Level—Youth will be educated on civic responsibility as part of the Character Counts program

## Seniors in Poverty

Population and poverty estimates for persons age 65 and up are shown for the report area. According to the American Community Survey (ACS) 5 year data, an average of $11.6 \%$ of people lived in a state of poverty during the survey calendar
year. The poverty rate for people living in the report area is less than the national average of $9.3 \%$.

| Report Area | Ages 65 and Up <br> Total Population | Ages 65 and Up <br> In Poverty | Ages 65 and Up <br> Poverty Rate |

## Population Age 65+

Of the estimated 634,548 total population in the report area, an estimated 90,268 persons are adults aged 65 and older, representing $14.23 \%$ of the population. These data are based on the latest U.S. Census Bureau American Community Survey 5year estimates. The number of older adults in the report area is relevant because this population has unique needs which should be considered separately from other age groups.

| Report Area | Total Population | Population Age 65+ | Population Age 65+, Percent |
| :--- | ---: | ---: | ---: |
| Report Location | 634,548 | 90,268 | $14.23 \%$ |

## Life Expectancy by Census Tract

This indicator reports the average life expectancy at birth. Life expectancy measures the average number of years from birth a person can expect to live, according to the current mortality experience (age-specific death rates) of the population. Life expectancy takes into account the number of deaths in a given time period and the average number of people at risk of dying during that period, allowing us to compare data across census tracts with different population sizes.

Within the report area, the average life expectancy at birth is 76.69 of the total population.
Note: Data are suppressed for counties with fewer than 20 deaths in the time frame.

| Report Area | Total Population (2010-2015) | Life Expectancy at Birth (2010-15) | Life Expectancy at Birth, 2010 2015 |

## Life Expectancy (2010-2015) - Geographic Disparity

The tables and charts below display summary measures describing the distribution of life expectancy values within the report area, including the range (maximum - minimum) and variance. Variance measures include the standard and weighted variance. Weighted variance takes into consideration the population of the neighborhoods/census tracts in determining the
spread or values.

| Report Area | Minimum | 1st Quartile | Median | 3rd Quartile | Maximum |
| :--- | ---: | ---: | ---: | ---: | ---: |
| Report Location | 64.30 | 73.50 | 75.60 | 78.70 | 8 |

| Sumter County, SC | 13.3 | 14.8 | 12.2 |

## Period Life Table (2010-2015)

This indicator reports the probability of dying between the ages referenced in each category (among the population living to the first age in the reference category). For example, the data in column Ages 1-4 expresses the probability of dying between one and four years of age. Data values are expressed as a percentage.

## Education

## Educational Attainment

Educational Attainment shows the distribution of the highest level of education achieved in the report area, and helps schools and businesses to understand the needs of adults, whether it be workforce training or the ability to develop science, technology, engineering, and mathematics opportunities. Educational attainment is calculated for persons over 25 , and is an estimated average for the period from 2014 to 2019.
For the selected area, $18.9 \%$ have at least a college bachelor's degree, while $26.8 \%$ stopped their formal educational attainment after high school.

| Report Area | No High School Diploma | High School Only | Some College | Associates Degree | Bachelors <br> Degree | Graduate or <br> Professional Degree |

## Head Start

Head Start is a program designed to help children from birth to age five who come from families at or below poverty level. The program's goal is to help children become ready for kindergarten while also providing the needed requirements to thrive, including health care and food support.
This indicator reports the number and rate of Head Start program facilities per 10,000 children under age 5. Head Start facility data is acquired from the US Department of Health and Human Services (HHS) 2020 Head Start locator. Population data is from the 2010 US Decennial Census. The report area has a total 25 Head Start programs with a rate of 6.3 per 10,000 children under 5 years old.

| Report Area | Children Under Age $5$ | Total Head Start Programs | Head Start Programs, Rate (Per 10,000 Children) |

## Enrollment Age 3-4

This indicator reports the percentage of the population age 3-4 that is enrolled in school. This indicator helps identify places where pre-school opportunities are either abundant or lacking in the educational system.

Note: This indicator is compared to the state average.
Data Source: US Census Bureau, American Community Survey. 2015-19. Source geography: Tract

## Adult Literacy

Literacy data published by the Program for the International Assessment of Adult Compentencies (PIACC) breaks adult literacy into three different "Levels". Those reported as Level 1 are at risk for being able to understand printed material. Those at the upper end of Level 1 can read and understand the text well enough to be able to perform small task, but might have difficultly understanding or drawing inferences from multiple forms of text. Those at the lower end may struggle with basic vocabulary or even be functionally illiterate.

The percentage at or below Level 1 for literacy in the report area is estimated at $23.8 \%$, with a $95 \%$ probability that the actual (true, unknown) percentage is between 19.7\% and 27.7\%.

| Report <br> Area | Population <br> Ages 16-74 | Total At or Below Level 1 | At or <br> Below <br> Level 1 | Total Lower <br> Credible <br> Interval | Lower <br> Credible <br> Interval | Total Upper <br> Credible <br> Interval | Upper <br> Credible <br> Interval |  |

Note: This indicator is compared to the state average.
Data Source: National Center for Education Statistics, NCES - Program for the International Assessment of Adult Competencies. 2017.

## Adult Literacy Level 2

Those reported at Level 2 still struggle to perform text based informational tasks, but are considered to be nearing reading proficiency. People in this literacy level can usually be able to read printed words and digital print, as well as being able to relate and make inferences from multiple pieces of information that can be pulled from more than one document. Complex evaluation and inferencing may still be too difficult.

The percentage at or below Level 2 for literacy in the report area is estimated at $33.3 \%$, with a $95 \%$ probability that the actual (true, unknown) percentage is between $27.9 \%$ and $38.3 \%$.

| Report Area | Population <br> Ages 16-74 | Total At or Below Level 2 | At or Below Level 2 | Total Lower Credible Interval | Lower Credible Interval | Total Upper Credible Interval | Upper Credible Interval |

## Adult Literacy Level 3

Those reported at Level 3 still are proficient in reading. This includes being able to understand and work with multiple complex texts, while still being able to evaluate the reliability of sources. People in this level can infer complex ideas and sophisticated
meanings from written documents and texts.

The percentage at or below Level 3 for literacy in the report area is estimated at $42.9 \%$, with a $95 \%$ probability that the actual (true, unknown) percentage is between $38.1 \%$ and $47.9 \%$.

| Report Area | Population <br> Ages 16-74 | Total At or Below Level 3 | At or Below Level 3 | Total Lower Credible Interval | Lower Credible Interval | Total Upper Credible Interval | Upper Credible Interval |

## Vacancy Rates

The U.S. Postal Service provided information quarterly to the U.S. Department of Housing and Urban Development on 141
addresses identified as vacant in the previous quarter. Residential and business vacancy rates for the report area in the fourth quarter of 2020 are reported.
For this reporting period, a total of 6,926 residential addresses were identified as vacant in the report area, a vacancy rate of $2.1 \%$, and 2,223 business addresses were also reported as vacant, a rate of $7.3 \%$.

## Evictions

This indicator reports information about formal evictions based on court records from 48 states and the District of Columbia, compiled by the Eviction Lab. The number evictions and eviction filings within the report area is shown in below. The "filing rate" is the ratio of the number of evictions filed in an area over the number of renter-occupied homes in that area. An "eviction rate" is the subset of those homes that received an eviction judgment in which renters were ordered to leave. For the year 2016, the Eviction Lab reports that, of 89,226 homes in the report area, there were 18,251 eviction filings, for an eviction filing rate of $20.45 \%$. 7,749 of the eviction filings ended in an eviction, for an eviction rate of $8.68 \%$.

Note: Not all counties have data that has been provided. Indicator data do not include information about "informal evictions", or those that happen outside of the courtroom.

Rates by race/ethnicity are calculated by aggregating data on evictions in census block groups with a majority of the population (over 50\%) belonging to a specific race/ethnicity. Reported race/ethnicity categories include: Non-Hispanic White; Black or Africa American; Asian, and Hispanic or Latino. In some counties there are no majority Black, Asian, or Hispanic census block groups.

Note: Not all counties or states have data that has been provided.

Eviction Filing Rate by Neighborhood Predominant Race/Ethnicity, 2016

## Eviction Filings by Neighborhood Predominant Race/Ethnicity, 2016

Totals by race/ethnicity are calculated by aggregating data on evictions in census block groups with a majority of the population (over 50\%) belonging to a specific race/ethnicity. Reported race/ethnicity categories include: Non-Hispanic White; Black or Africa American; Asian, and Hispanic or Latino. In some counties there are no majority Black, Asian, or Hispanic census block groups.

Note: Not all counties or states have data that has been provided.

## Household Income

Median annual household incomes in the report area for 2020 are shown in the table below. Since this reports a median amount, a "Report Area" value is not able to be calculated.

| Report Area | Estimated Population |  |
| :--- | ---: | ---: |
| Clarendon County, SC | 32,071 | Median Household Income |
| Kershaw County, SC | 66,806 | $\$ 52,983$ |
| Lee County, SC | 15,087 | $\$ 60,397$ |
| Richland County, SC | 391,569 | $\$ 40,400$ |
| Sumter County, SC | 103,907 | $\$ 56,993$ |
| South Carolina | $5,094,232$ | $\$ 45,724$ |
| United States | $322,448,689$ | $\$ 57,216$ |

## Jobs and Earnings by Sector

The number of jobs and total wage and salary earnings from employment in the report area are broken down by economic sector in this indicator output. These figures include both private and government employment. The sectors listed represent private employment except for the last table which includes all the earnings from jobs with local, state and federal government. A negative number means that overall business in that sector lost money for the year in the report area.

## Notes:

(D) - Not shown to avoid disclosure of confidential information, but the estimates for this item are included in the totals
(L) - Less than $\$ 50,000$, but the estimates for this item are included in the totals
(no data) - Data not available for this year.

## Nutrition

## Free and Reduced Lunch Program

Free or reduced price lunches are served to qualifying students in families with income between under 185 percent (reduced price) or under 130\% (free lunch) of the US federal poverty threshold as part of the federal National School Lunch Program (NSLP).

Out of 99,805 total public school students in the report area, 73,474 were eligible for the free or reduced price lunch program in the latest report year. This represents $73.62 \%$ of public school students, which is higher than the state average of $63.21 \%$.

| United States | 73,641,039 | 13,411,620 | 18.21\% |

## Food Insecurity - Food Insecure Population Ineligible for Assistance

This indicator reports the estimated percentage of the total population and the population under age 18 that experienced food insecurity at some point during the report year, but are ineligible for State or Federal nutrition assistance. Food insecurity is the household-level economic and social condition of limited or uncertain access to adequate food. Assistance eligibility is determined based on household income of the food insecure households relative to the maximum income-to-poverty ratio for assistance programs (SNAP, WIC, school meals, CSFP and TEFAP).

| Report Area | Food Insecure Population | Food Insecure Population Ineligible for Assistance, Percent | Food Insecure Children | Food Insecure Children Ineligible for Assistance, Percent |

## Low Income and Low Food Access

This indicator reports the percentage of the low income population with low food access. Low food access is defined as living more than $1 / 2$ mile from the nearest supermarket, supercenter, or large grocery store. Data are from the April 2021 Food Access Research Atlas dataset. This indicator is relevant because it highlights populations and geographies facing food insecurity.
$35.40 \%$ of the low-income population in the report area have low food access. The total low-income population in the report area with low food access is 83,502 .

| Report Area | Total Population | Low Income Population | Low Income Population with Low Food Access | Percent Low Income Population with Low Food Access |

## Persons Receiving Medicare

The total number of persons receiving Medicare is shown, broken down by number over 65 and number of disabled persons receiving Medicare for the report area. The U.S. Department of Health and Human Services reported that a total of 115,907 persons were receiving Medicare benefits in the report area in 2019. A large number of individuals in our society are aware that persons over 65 years of age receive Medicare; however, many of them are unaware that disabled persons also receive Medicare benefits. A total of 20,329 disabled persons in the report area received Medicare benefits in 2019.

| Report Area | Persons Over $\mathbf{6 5}$ Receiving Medicare | Disabled Persons Receiving Medicare | Total Persons Receiving Medicare |
| :--- | ---: | ---: | ---: |
| Report Location | 95,578 | 20,329 | 115,907 |
| Clarendon County, SC | 7,244 | 1,619 | 8,863 |

## Uninsured Population

The uninsured population of 2019 is calculated by estimating the number of persons eligible for insurance (generally those under 65) minus the estimated number of insured persons.

[^4]

Uninsured Population, Percent by County, SAHIE 2019

## Asthma Prevalence

Within the report area, there were 56,579 adults age 18 and older who self-report that they have ever been told by a doctor, nurse, or other health professional that they had asthma. This represents $13.1 \%$ of the total survey population age 18 and older.

| Report Area | Survey Population <br> (Adults Age 18+) | Total Adults with Asthma | Percent Adults with Asthma |
| :--- | ---: | ---: | ---: |
| Report Location | 432,946 | 56,579 | $13.1 \%$ |
| Clarendon County, SC | 24,219 | 4,463 | $18.4 \%$ |
| Kershaw County, SC | 50,500 | 6,511 | $12.9 \%$ |
| Lee County, SC | 15,367 | 3,226 | $21.0 \%$ |
| Richland County, SC | 272,563 | 31,820 | $11.7 \%$ |

The table below displays the prevalence of asthma among the adult population by race/ethnicity

| Report Area | Non-Hispanic White | Non-Hispanic Black | Non-Hispanic Other Race | Hispanic or Latino |
| :--- | ---: | ---: | ---: | ---: |
| South Carolina | $12.5 \%$ | $13.6 \%$ | $14.8 \%$ | $13.2 \%$ |
| United States | $13.2 \%$ | $15.8 \%$ | $11.9 \%$ | $12.0 \%$ |

Note: No county data available. See data source and methodology for more details.

## Deaths of Despair

This indicator reports the rate of death due to intentional self-harm (suicide), alcohol-related disease, and drug overdoses per 100,000 population. Figures are reported as rates age-adjusted to year 2000 standard. Rates are resummarized for report areas from county level data, only where data is available. This indicator is relevant because suicide is an indicator of poor mental health.

| Report Area | Total Population | Avg. Annual Deaths, 2011-2017 | Mortality Rate, 2001-2007 | Mortality Rate, 2011-2017 |
| :--- | ---: | ---: | ---: | ---: |
| Report Location | 624,972 | 210 | 23.33 | 33.60 |

| South Carolina | $4,841,701$ | 2,123 | 30.6 | 43.9 |
| United States | $318,679,623$ | 129,605 | 28.9 | 40.67 |

[^6]
## Built Environment

## Broadband Access

This indicator reports the percentage of population with access to high-speed internet. Data are based on the reported service area of providers offering download speeds of 25 MBPS or more and upload speeds of 3 MBPS or more. This data represent both wireline and fixed/terrestrial wireless internet providers. Cellular internet providers are not included.

| Report Area | Total Population (2020) | Access to DL Speeds > 25MBPS (2020) | Percentage of Population with Access to Broadband Internet (DL Speeds > 25MBPS) |
| :---: | :---: | :---: | :---: |
| Report Location | 642,997 | 97.20\% |  |
| Clarendon County, SC | 33,415 | 98.43\% | - |
| Kershaw County, SC | 67,471 | 90.12\% |  |
| Lee County, SC | 16,701 | 89.31\% | Report Location (97.20\%) |
| Richland County, SC | 419,050 | 98.29\% | - United States (97.54\%) |
| Sumter County, SC | 106,360 | 98.25\% |  |
| South Carolina | 5,217,820 | 95.65\% |  |
| United States | 332,650,128 | 97.54\% |  |

Note: This indicator is compared to the state average
